

BIOGRAPHY

Sanjeev Katwa

Technology Director, Tottenham Hotspur Football Club

Sanjeev Katwa is the Technology Director at Tottenham Hotspur Football Club. He is responsible for defining the strategy and delivering the overarching technology vision for the organisation, supporting the growth of fan and sponsor relationships through Technology, with operational responsibilities for IT, improving and driving value from the Club's business applications and innovating with the Club's digital products and media infrastructure.

Sanjeev led the strategy & direction for the project team that delivered technology for one of the most technologically advanced stadiums in the world, the Tottenham Hotspur Stadium, which opened in April 2019. Sanjeev's role is to look for innovative solutions around emerging digital business models and technologies.

In a career spanning over 30 years in technology, Sanjeev has held senior roles in sport, media and entertainment having been the IT Director at City Football Group / Manchester City for four years from 2010, where he led the transformation of business systems, technology infrastructure and innovative technologies. Previously, Sanjeev spent a combined 12 years in senior roles with Sony BMG Music Entertainment and MTV Networks International where his focus was on the design and implementation of corporate technologies.

Sanjeev is also a Board Advisor to the Manchester Originals who participate in The Hundred Cricket Tournament, an exciting format of the game encouraging new fan experiences & participation.

Married for over 30 years, with two adult children, Sanjeev's passions outside of work include overseas travel, photography, playing golf and watching as much sport as he can especially Football, Cricket, Golf and Formula 1.
